Included with the Camera:

- 6' USB Cable
 - Enhanced Tripod
 - LCD Clip Mount
 - Internal Microphone
 - 2 Year Warranty
- Operating systems XP, Win 7
Win 8, MAC OS 10 and above

A quality camera that is more sophisticated than the plastic web cameras that are currently on the market today yet is less costly than a High-end solution. This efficient, durable camera has a WAI interface with a streaming live feed. This allows you to import pictures *directly* into your ID software application making the addition of a photo into your software a completely seamless process! The **HD IMAGE CAM PRO** will capture still images in high resolution which can then be saved to a folder and easily imported into any software you choose.

The oversize lens allows in plenty of light. This makes high-quality photos possible - *even without a flash*. It has an extra long 6' USB cord and a tripod mount that allows you to mount your camera on the tripod, away from the computer. And it's sturdy: encased in high quality brushed steel. Designed to take *incredibly clear photos for years to come*, this camera will eliminate the need to find a replacement every few months and you can avoid searching for a camera that must work with twain drivers and/or special software.
