THE SECURE SIDE OF INNOVATION

WebLink ID

Transform your device into a powerful
ID card workstation.

TRANSFORM YOUR DEVICE INTO A POWERFUL ID CARD WORKSTATION

Whether you need to issue photo ID cards from a single-site campus or multiple locations, WebLink ID gives your organization the ability to create and manage a feature-rich, web-based ID card issuance process with ease.

WebLink ID is a powerful web-based browser application that enables you to securely and effectively execute workflows from an intuitive online interface for simple and complex enrollment, credential issuance, and card management.

Features:

- **Web app management tools for form design, workflow design, and card design**
- **Support for multiple photo and signature capture devices within the WebLink ID capture modules**
- **Centralized database management and synchronization for your multi-application card management system**

Optional advanced features:

- **Facial recognition (reduces fraudulent credentials)**
- **Integrated document authentication software and hardware scanners (enhances identity verification)**

REDUCE OVERHEAD AND SIMPLIFY HOW YOU CREDENTIAL

WebLink ID is a SaaS application (hosted solution) that empowers your administrators to scale and manage your ID card issuance process from a single web-based portal. Administrators easily create a wide range of configurable workflows and forms, so new features or process changes do not require development resources and change requests. WebLink ID also eliminates the overhead of managing local PC installations and license keys.

- **Improve data management**
- **Integrate existing hardware**
- **Reduce implementation time**
- **Eliminate IT infrastructure**
- **Scale users and locations**
- **Do more with less staff**
- **No client PC installation & license overhead**
- **Manage card lifecycle**
- **Incorporate optional facial recognition matching and multi-application smart card encoding**

WebLink ID transforms any authorized device with internet access into a feature-rich photo ID card processing workstation.

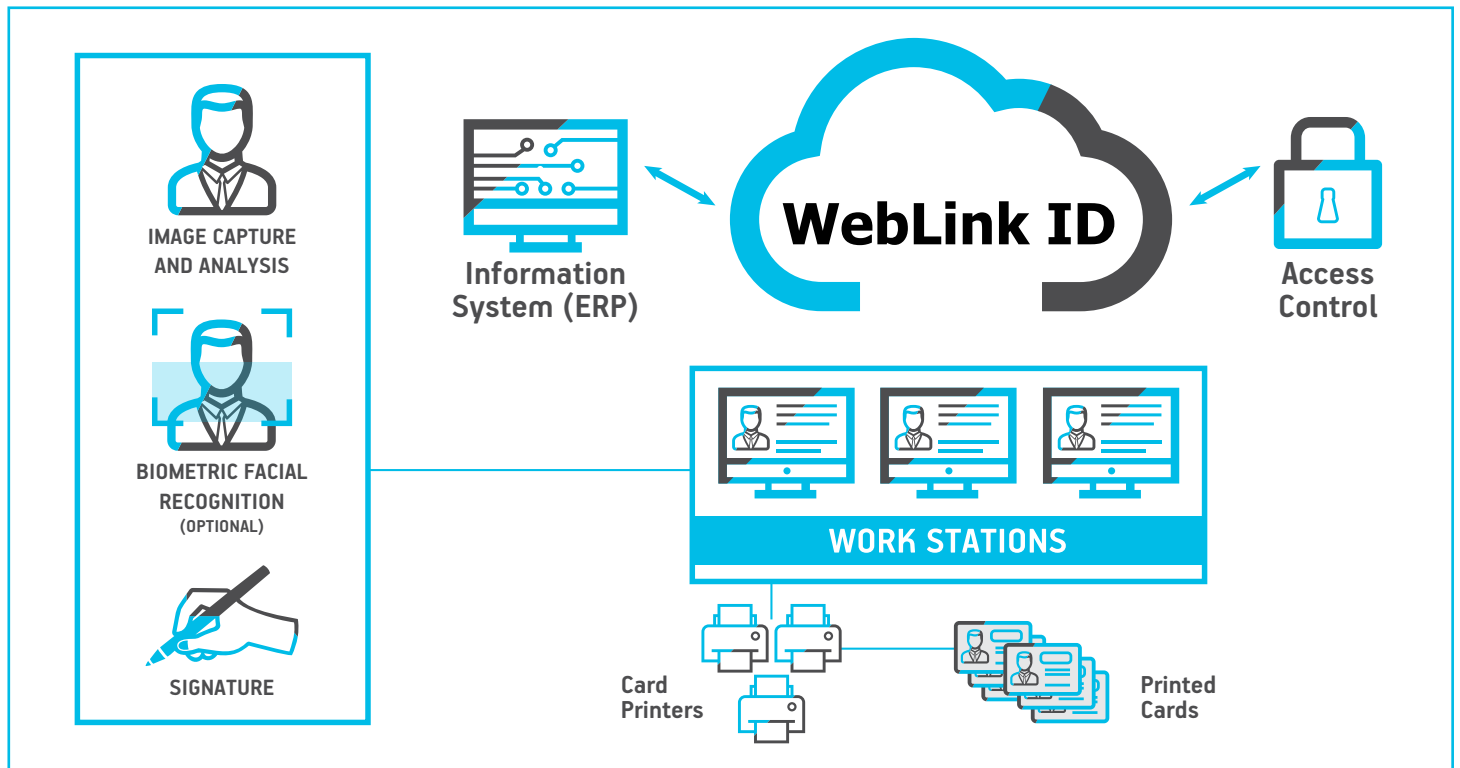

DESIGN YOUR OWN WORKFLOW PROCESS

WebLink ID's designer modules make it easy for administrators to design card layouts and deploy configurable workflows to manage your data exactly the way you want. Simply drag and drop from the menu and save your changes. It's that simple. Once you have your configured designs in place, your workflows follow you across any PC or device with every sign-in.

WITH WEBLINK ID, YOU CAN:

- Design your own data entry forms
- Use your own printers and cameras
- Create your workflow process
- Design your own card layouts
- Create your users & user groups
- Manage your card lifecycle

RELY ON VALID'S IDENTITY EXPERIENCE
