Color shown is for representation purposes only of the holographic effect. (not actual size)

Added Security: holographic image makes duplication extremely difficult • **Increased Durability:** add years to the image on your card with our protective laminate • **Pressure Sensitive:** easy to apply to any card formulation, **great for prox cards!** • **Economical Security:** added security without the cost of upgrading your printer • **Custom Holograms:** send us your logo or artwork, we'll do the rest (\$250 die fee) • **ID Guarantee:** we will not reproduce your custom design for any other company • **Fast Turnaround:** custom orders are shipped within three weeks of proof approval, stock designs are shipped within 24 hours with availability • **Short Runs:** 250 unit minimum

PVC-OVL - SHIELD AND KEY

The demand today for customized security card solutions is greater than ever. Unfortunately, most custom solutions are only cost effective for larger organizations. Smaller companies are typically forced to accept "stock" images that were not unique to their organization.

Gill Associates is proud to offer a full line of stock and **custom pressure sensitive holographic overlays**. These hand applied overlays do not require the use of any hardware. Your clients can use them to add security and durability to any identification system.
